

FLOUR RECLAIM

Bread Lines

W.D. Laramore is the only fully integrated Flour Reclaim System provider in the world. Throughout over four decades of operation, Laramore has developed and introduced several innovative design features ensuring that our reclaim systems offer superior performance and durability.

Laramore designs and supplies dusting flour supply and reclaim systems world-wide. Our bread line systems consist of a remote mounted recovery unit, an automatically filled supply hopper, enclosure with flour sifter, collection hoods and ~~hoppers for the overhead proofer~~. Our two-stage centrifugal filters ensure that dough and other solids that enter the system are separated from the recovered flour stream. The addition of our cyclonic separator can prevent materials like seeds or nuts from contaminating the recovered flour stream. Recovered flour can either be re-used on the line or taken to waste.

Save money and increase your efforts towards sustainability with a dusting flour supply and recovery system from Laramore. Our Global Customer Service Team will be there to help you keep your system running at its best with a full range of replacement parts and a staff of qualified service technicians.

.....

Product lines for the baking industry we serve:

- vacuum systems
- filtration systems
- supply hoppers
- cyclones
- auger units
- aluminum, stainless steel and steel pipe fittings

Complete Integrated Flour Reclaim Systems

- Muffin Lines
- Bread Lines
- Roll Lines
- Sheeted Dough Lines

Legacy Unit Replacement Program

Replace your legacy Laramore reclaim unit with a NFPA/ATEX compliant unit.
