

AUTOMATION & IT

Clarity process management

Confidence. Built in.

Shick Esteve provides integrated data and process control that focuses on giving customers greater access to their data. Clarity process management provides clarity of data in a contextual format, allowing customers to make real-time decisions that will maximize their production efficiencies.

The Shick Esteve process management software integrates with new and existing automated ingredient handling systems. Our software provides recipe and batch management, process control, production scheduling, lot tracking/traceability, and process data acquisition. It can integrate with various front-end management software seamlessly. All data is stored onsite allowing for extensive and complete recordkeeping.

Subscription benefits

- 24/7 remote support resources
- Free software updates per annual contract terms
- Yearly system check-up
- Live training service on request
- VPN access service
- No upfront software cost

Clarity software suite

What innovation looks like

Shick Esteve has designed integrated, easy, and secure systems for anyone to use. Simply put, we provide the right data so you can make decisions.

Production management

- Provides full control of production scheduling
- Easily add / edit recipes
- Track ingredient quantities and lot codes

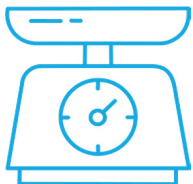

Schedule viewer

- Keep personnel informed about the production schedule
- Enables a read-only view of batch processing

Data management

- See real-time and historical data
- Enables quick determination of system inefficiencies
- Promotes preventative/proactive maintenance

Pre-scale minor / micro ingredients

- Provides for consistent, repeatable dosing of ingredients
- Support for multiple pre-scale stations
- Provides full lot traceability (barcode scanning / traveler tickets)

Advanced batch reporting

- Customizable view into production data
- Supports integrated data-sharing to remote ERP systems

Traceability & lot tracking

- Enables full lot traceability of major ingredients
- Assign lot codes upon receipt of each ingredient
- Full support for lot association to batches
